

BRIGHT SEEDS INTERNATIONAL KINDERGARTEN

" Nurturing Young Minds to Become Kind & Happy Lifelong Learners "

15th November 2019

The spirit of Loy Krathong is about paying respect to the water.

This tradition can help us to see how we can be better social contributors to our external world and be a Team Player for the Earth.

Krathongs traditional are made from natural materials, and at Bright Seeds we want to promote choices that help us all. The children had a chance to make their own Krathongs, with sweet scented flowers, banana leaves, and a paper version during arts and crafts.

At the end of their school day, they floated their Krathongs at school with their family, allowing us to be responsible for cleaning up our Krathongs from the water.

Here's to our good wishes for the year ahead!

A huge thank you for all the support from parents. Your involvement has a meaningful impact, and seeing happy children with their parents at this event, made the day.

Good wishes to you and the year ahead,
From the Bright Seeds Family

We welcomed the spirit of fun (sanook) into our school ground with activities such as, krathong making, Thai dancing, "Mon Son Pha", picture memory matching games, fishing eggs activity and "pa-krapong".

6 Core Skillsets at Bright Seeds

Rainbow Seedlings Activity Spotlight

K1's curiosity was peaked when the magnifying glasses were introduced last week.

What does a tire look like close up? What does it feel like?

Explorative activities with magnifying glasses change the perspective and advocate learning on the mirco level, in very macro way. A whole new world opens up, grasped in their fine motor skills and enriched in critical thinking; a magnifying class is a tool that even boosts their language skills.

I can see the world in a new way!

Hypnotize with me, if you will. Will my boat sink or float? How can we move our boats over the water? Can it become a race? What are the materials? Why does it float?

Inquisitiveness is a aspect of us all. To be curious is the desire to learn.

Independent Thinkers & Communicators

Wonder Seeds Activity Spotlight

Wonder Seeds have also been sailing through their water transportation this week!

The students have been enthralled in learning about boats, ships, submarines and ferries. Working alongside the vocabulary, the students also learnt the concept of 'sink and float'.

What are the objects? Sink means it sinks to the bottom of the water. Float means it floats on the water, like a boat! What do you think is going to happen?

Wonder Seedlings made their own little boats, and had the chance to sail them on the water! Anything that is to do with water is a treat for the students, and merging learning of water transportation, sink and float, learning cause and effect and oral motor exercise (being the wind).

Creative Individuals

Social Contributors

Together, they painted the giant boat! Proudly, this boat is now displayed for them to see their group efforts!

Ballet Class

Wow! What a week it has been!

We are proud to state that our afterschool programs have been going wonderfully.

Taekwondo

Our classes are Music and Movement, Little Chef, Taekwondo and Ballet.

These activities, from a young age can teach the children executive function, self regulation, confidence and could plant a passionate seed for the their future!

Music and Movement

Little Chef

This week we have also started a new tradition in Bright Seeds. Meal time is a time of the day where we can all come together to say thank you for the nutrition we receive to help our body develop and grow.

Thank you for the food we eat,
Thank you for the friends we meet,
Thank you for the world so sweet,
Thank you, for everything.

We were able to have a moment of togetherness, silent reflection to give thanks for food and the many blessing we receive, as well as practicing patience.

3 Things You Can Do with Your Child At Home.

1. When you are walking in the community, try pointing out transportation and emergency services you encounter. Added tip: what noise does ____ make?
2. When you are moving around your home, what kinds of transport can you be? Choo choo train to the loo? A submarine as you go down the elevator? Drive your imagination into the days movements!
3. Does your child have a bicycle or tricycle? Riding a bike is a vital skill and an activity that you can share together.

Important dates coming up:

We had a colourful Loy Krathong celebration on 12th November
Currently we are excitably gearing up for the end of term Christmas concert on Friday 13th December.
